Welcome to my 2019 Bulb Catalogue.

A smaller selection this year due to the relocation of the nursery just prior to Christmas. No Ixia or Moraea villosa this year sorry, as I am rebuilding stocks again, but hopefully you will find some treasures of interest to you.

Bulbs are of flowering size unless otherwise stated. Dry bulbs will be sent in paper bags for planting as you can within a few weeks of receiving them. Those bulbs that have roots/green tops will be sent wrapped in damp paper in snaplock bags but please note they will need planting straight away.

To order please send me a list of what you would like via email (an order form is available by request if needed). Email is my preferred form of contact please. **Orders will be filled according to the date received**, so if you really want something then please email your order in as quickly as possible. You are welcome to include a few alternatives.

As bulb packets come in various sizes, I have chosen not to include exact costs for postage and packing, as this will depend on the size of your order, whether you live rurally or in an urban area. As a general guide, I will send smaller packets in bubble wrapped courier bags, and larger orders in small courier boxes. P & P charges will be added when I confirm your order prior to payment. (Please note that there is no extra postage charge for bulbs when ordering plants as well).

Payment by direct credit into my bank account is preferred, but I will also accept cheques. I cannot accept credit card payments for bulbs except those purchased online

Kind regards,

Kate Jury

Seaflowers Nursery

Please Note: Any bulbs marked 'FEW' are in short supply and are limited to one packet of bulbs per customer. 'Bulbs' are referred to throughout, but can mean corms in some cases.

All are flowering size unless specifically stated otherwise.

(MP) moist-packed...these bulbs will be sent wrapped in damp newspaper and will need planting straight away.

Acis autumnalis

5 bulbs \$5.00

(syn. *Leucojum autumnale*) Gorgeous wee bulb ideal for keeping in a pot or rockgarden. Upright dark flower stems carry dainty white hanging bells in autumn, each one lightly flushed with burgundy near the base. RHS Award of Garden Merit. H to 20cm.

***Babiana plicata* 'Splish Splash'**

3 bulbs \$5.00

Upright spikes of lovely pure white flowers to around 20cm in height. Full sun, strong grower.

***Crocsmia x crocosmiiflora* 'George Davison'**

FEW

3 bulbs \$5.00

Spikes of gorgeous buttery yellow flowers open from light orange buds in mid-summer. Needs summer watering. Flowers well but not weedy at all. 50-70cm high. **(MP)**

***Cypella coelestis* slate blue**

FEW

3 bulbs \$5.00

Tall stems wave in the morning breeze, topped by large grey-blue flowers, each petal carrying a small yellow highlight near the centre. This one flowers all summer (with regular water) at around 80cm high for me. **(MP)**

Galtonia princeps

FEW

3 bulbs \$6.00

Impressive spikes of creamy, palest lime green bells over strappy, slightly fleshy grey-green leaves in summer. Prefers sun and good but well-drained soils. Grows to around 90cm high. **(MP)**

Gladiolus alatus

5 bulbs \$5.00

Dwarf species which bears spikes of bright orange, green and yellow flowers in spring. Best grown in pots where the small bulbs won't be lost. Full sun. Height 20cm.

***Gladiolus cardinalis* 'Hybrid'**

3 bulbs \$5.00

Given to me as the true species but further research shows that this is a hybrid of *G. cardinalis*, the species itself not really being suitable for the garden due to it preferring to grow near waterfalls! One of the most vivid and stunning flowers in my early summer garden with spikes of large but elegant flowers of a very vivid dark red, nicely marked with white on the lower petals, and a silver reverse. Height 50-60cm.

Ledebouria cooperi

5 bulbs \$5.00

Hardy little bulb that forms clumps and multiplies quite well. Prefers some shade but is pretty tough. Long narrow leaves, green with dark stripes, and little spikes of pink flowers similar to *Scilla* species. H 10-30cm. (MP)

Micranthus junceus

3 bulbs \$5.00

A rarely offered and very unusual South African bulb of the Iris family. Stiff upright reed-like leaves and then gorgeous spikes of absolutely true-blue flowers appear in late spring and summer. Easy to grow provided it has adequate moisture, without being boggy. Tiny bulbs that pack a punch. 30cm H.

***Moraea vegeta* mauve**

5 bulbs \$5.00

A lower growing species with unusual brownish mauve flowers, each with a yellow mark on the nectar guides. Very pretty when all the flowers come out together. H to 20cm.

Nerine bowdenii

FEW

3 bulbs \$6.00

Large umbels of beautiful pink flowers on sturdy stems above the strap-like leaves, in late autumn. H 40-50cm (MP).

Nerine filifolia

3 bulbs \$5.00

Delicate little heads of deep pink flowers in late summer, above grass-like foliage. A real little treasure. H 15-20cm. (MP)

***Romulea rosea* 'Alba'**

3 bulbs \$5.00

Narrow dark green foliage and masses of satiny pure white flowers with a greenish-yellow throat.

***Tigridia pavonia* Red spotted**

3 bulbs \$5.00

Gorgeous big bright scarlet red flowers in summer, each with a fiery yellow edge to cupped centre, which is also heavily blotched with red.

***Tulbaghia simmleri* Pot Luck**

FEW

2 bulbs \$6.00

Take pot luck with this beautiful species – so far the sweetly scented umbels of flowers have been various shades of pink and a few white ones. Only a few smaller but flowering size bulbs. Will eventually grow quite large, with strappy grey-green leaves and a succession of flower stems 30-50cm. Usually flowers in spring and autumn.
